PACOS — Shot List & Capture Recipe

Record each clip at **1920×1080**, browser zoom 100%, hide bookmarks bar. App at `http://127.0.0.1:8000`. Save files into `screenshots/` with the exact names below so the intro script (`01-intro-script.md`) references resolve.

For a screen recorder: capture a few seconds of hold before/after each action so the editor has handles. Move the cursor deliberately — it's on camera.

File name	Page / URL	State to capture	Action to record
`01-dashboard.png`	`/`	429 leads, agent board idle	Static hold (hook shot)
`02-dashboard-generate.png`	`/`	Generate panel + agent board	Click **Dry-run**, board lights up
`03-leads-enriched.png`	`/leads` → search `Acme`	3 Acme rows w/ predicted email + chips	Slow scroll / hold on a Predicted Email cell
`04-assets.png`	`/assets/acme-robotics-asha`	Four asset tabs	Click through tabs; hover **Copy** → "Copied ✓"
`05-discovery-variants.png`	`/discovery?company=Razorpay&role=Backend%20Engineer&city=Bengaluru`	7 variant cards + Auto-import panel	Type company, click **Build searches**
`06-find-people.png`	`/discovery?...`	Progress pills mid-run	Click **Find People**, capture the pills lighting
`07-imported.png`	`/discovery?...`	Paste box + **"3 leads imported."**	Paste demo HTML → **Import from pasted results**
`08-approvals.png`	`/approvals`	Ready-to-send + unmatched replies	Click **Mark sent as → DM**

File name	Page / URL	State to capture	Action to record
`09-tracker.png`	`/tracker`	Pipeline table, status pills	A status pill animating pending→sent
`10-chat.png`	`/chat`	Empty chat with prompt hint	(optional) type a describe-a-person line

Recommended recording order (single continuous session)

Record the **demo walkthrough** (`06-demo-walkthrough.md`) in one pass — it naturally produces frames 05 → 06 → 07 → 03 → 02 → 04 → 08 → 09 in the right order, so you get a coherent screen recording *and* the stills from the same take.

Capture tips

- Use the demo company **Acme Robotics** so numbers match the script (3 leads imported).
- Run generation in **Dry-run** — visually identical, no key needed, instant.
- For the "Find People" progress pills (frame 06), they animate quickly; record at 60fps if possible, then slow to 0.5× in edit for a satisfying reveal.
- After recording, delete the demo leads (clean-up command in `06-demo-walkthrough.md`).

Crops the editor will want

- Tight crop of one **Predicted Email + MEDIUM chip** (for the S5 zoom-punch).
- Tight crop of the **Agent Status** row (for the S6 sequence light-up).
- Tight crop of the sidebar footer **"never auto-sends"** (for the S8 trust beat).
